

KB² Consulting Structural and Civil Engineers LLP

KB² started life in 1982 as Kenneth Brown and Partners, Consulting Civil and Structural Engineers, since when we have grown in ability and reputation. We bring **innovation, extraordinary effort, personal service, flexibility** and a **cost advantage** to all our projects.

Our portfolio covers a wide range of buildings, and illustrates the experience and expertise we can bring to your project, enabling you to benefit from an economic use of resources, economy of design, and enabling an early start on site.

We have advised on conservation, educational, commercial, industrial, healthcare and residential projects; both new-build and refurbishment, public and private, greenfield and brownfield.

Our wide-ranging experience also includes all conventional building materials, design of infrastructure elements such as roads/drainage/bridges/retaining walls, and Expert Witness services in court actions.

We currently have 6 engineers and technicians, all qualified under the Construction Skills Certification Scheme (CSCS). Computer draughting uses AutoCAD 2010. Technical design software includes ROBOT Millennium, SCALE, TEDDS, PDS and RAM.

Providing engineering certainty by delivering intelligent designs, minimising project risk and applying principles of sustainability.
